LIBRARY

Anemone.

In preparing the Herbaceous Plant Border, dig deeply, and freely add well-decayed stable manure; after digging or trenching, the ground should be allowed a few days to settle before planting. Plant only when the soil is in a friable condition; it is better to lay plants in if the ground is not in good working order and wait rather than plant in wet clammy soil.

After planting the soil should be gently pressed round the collars or neck of the plants. This is most important, especially on freshly dug ground, where plants will often require recollaring two or three weeks after planting, while some which may have been drawn below their proper depth with the settling of the soil will require raising to their proper level. Use the hoe freely on fresh plantations, keeping the surface soil well broken.

The crust or surface soil of all plant borders should be carefully and thoroughly broken in Spring, and kept broken throughout the Summer; if this is persevered in, much labor will be saved in watering, as the evaporation of moisture from the soil will thus be greatly reduced; the soil is also in this way kept fertile, and fewer plants are lost during a long spell of dry weather. The free use of the hoe also effectively eradicates from the soil such pests as ground slugs, wire worm, millepedes, etc. The best tool to use in choice borders and rock-gardens is a small swan-necked onion hoe, and for larger plant borders a swan-necked draw hoe.

Rhizomatous plants (such as Irises, etc.) should, as a general rule, be planted with the rhizome near the surface.

Rapid-Growing Hardy Perennial Plants, such as many of the Helianthus, (Sunflowers), Asters (Michaelmas Daisies), etc., should be transplanted every two years, replanting not more than two or three of the strongest single crowns to form a clump.

Remarks on the Question of Sun or Shade for Plants

The whole question of Sun or Shade for plants is mainly dependent upon the amount of moisture a plant's roots can obtain from the soil. On rich and heavy land, or deeply dug and well manured soils, where sufficient root moisture exists, most plants will take all the sun they can get, whereas on shallow, thin, or badly dug soils, shade or partial shade is necessary to the successful growth of many plants, owing to the rapid evaporation of moisture from the soil and the plant's leaves, and the consequent starvation or overtaxing of

A FEW PRACTICAL HINTS ON THE CULTURE OF HARDY PERENNIALS AND HERBACEOUS PLANTS

From Barr's retail catalogue.

the roots. On poor, sandy, or shallow soils a heavy mulching of rotten manure, applied early in Spring or Autumn, will prove a valuable assistance to the growth of all hardy herbaceous plants, also a surface dressing in Autumn of sulphate of potash, at the rate of 2 cwt. to the acre, or $\frac{3}{4}$ oz. per square yd., should be applied annually to help retain all moisture possible in the soil.

So much do plants depend upon root-moisture that often a few small stones placed over the roots, to retard evaporation, will ensure their success where otherwise they could be a failure. Marsh plants, aquatic plants, and Alpine plants especially like full sunshine when they are able to obtain abundance of water at the roots; otherwise they are best grown in partial shade.

On hot, dry, sandy soils, deep digging (in Autumn if possible) is necessary at least every two or three years, with a liberal addition of well-rotted manure. An Autumnal surface dressing should annually be given of sulphate of potash at the rate of 2 cwt. to the acre and surface mulching of manure in February will prove of valuable assistance to the plants.

Many plants like peat because it acts like a sponge in the soil in holding moisture (which is one of the primary objects in dressing land with stable manure), and moreover it is warmer than loam. Plants again which object to loam will naturally thrive in peat.

In gardens where there is a little natural shade, this can generally be obtained by the use of tall-growing herbaceous plants or annuals, such as Sunflowers, clumps of Sweet Peas, Helianthus, Michaelmas Daisies, etc.

Best Time for Planting

On very dry, sandy, and hot soils, Autumn planting where possible is advocated, while on cold, wet, and heavy soils, Spring or very early Autumn planting will generally be found to be preferable. The best months in Autumn for planting hardy plants are September and October, while the Summer's warmth is still in the ground; the best Spring planting months are April and May. Most tap-rooted plants are best planted in Autumn. In cold districts all Autumn plantings should be protected with some slight covering, such as cut pine branches or very light litter which let in the air, but keeps off severest weather; cut fern or leaves are bad, as they lie too wet.

THE PALISADES NURSERIES

Some six years ago the inaugurators of the Palisades Nurseries recognizing the absence of a Nursery in the vicinity of New York City where a full representative stock of Hardy Perennials could be found in commercial quantities, established these Nurseries for this purpose.

We believe we have now as complete a stock of this class of plant growing in commercial quantities as can be found anywhere and as we have made them our specialty we are in a position to give the best of satisfaction in the filling of all orders intrusted to our care, and particularly solicit the trade of Seedsmen and Nurserymen who catalogue Perennials, but who have their orders filled and shipped outside their own establishment to go direct to their customers. We would guarantee to guard and protect their interest.

OUR LIST OF NOVELTIES AND SPECIALTIES.

Whilst many of the articles described under this caption are new and novel or among the latest introductions in the Hardy Perennial family, we do not intend to convey the idea that they are all novelties not before offered as we understand the term might imply, but, as there are so many valuable Hardy Plants of sterling merit unknown to the general trade we have given prominence and specialized several among this list that we find are not easily procured in quantity for the reason that they have fallen into obscurity, in this country at least, by disuse and are known only to the few.

The old saying that, "Nothing is new under the Sun" can perhaps be better applied in connection with these old fashioned flowers or the favorites of old time gardens than any other class of plants. Their having come into public favor in recent years has created an astonishing demand for not only improved forms, but many of the older or forgotten varieties which by long absence are strangers and look like subjects for a new christening.

As to their special use, great beauty and adaptability we make no comment here, for lack of space, but refer to the retail catalogues of Nurserymen who offer them for sale, the Horticultural department of all household magazines and the Horticultural press of today, all of which appear to give them more prominence than any other class of plants.

This popularity is not surprising when we consider the ease with which they are grown and the amount of neglect they will withstand.

Making as we do a specialty of growing Hardy Perennials gives us an opportunity of judging the different foreign and native Hardy Plants among which we frequently find a neglected one fallen towards the rear, but deserving of a front seat.

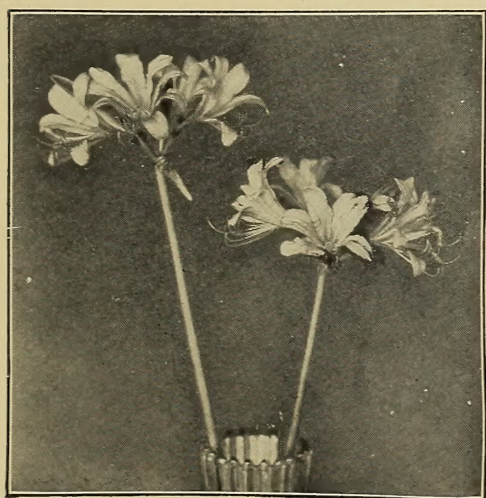

This we trust will explain our meaning for placing several varieties under this heading, hoping it will be found useful in attracting the attention of the trade and their customers towards them as many should be better known and would be found money-makers for the **retail catalogue trade as a leader**, especially at this time, when this class of plant is attracting so much of the gardening world attention.

In this connection we mention the following, (others if needed) and all of which would serve for the purpose named as we could supply them at very reasonable rates in quantity and in portable shape.

Eupatorium Colestinum (Hardy Perennial Ageratum); **Aquilegia** (Columbine Long Spurred Hybrids); **Boltonia Latisquama Nana** (Dwarf Single Pink Perennial Aster); **Delphinium Zalil** (Yellow Perennial Larkspur); **Dianthus Multiflorus Furst Bismarck** (Hardy Perpetual Flowering Carnation); **Lobelia Fulgens Queen Victoria** (The Black Foliage Cardinal Flower); **Veronica Longifolia Subsessilis** (Blue Jay Flower).

NOVELTIES AND SPECIALTIES.

Amaryllis Hallii or Lycoris Squamigera. A perfectly hardy Amaryllis producing beautiful pink flowers.

Amaryllis Hallii.

One of the very good things never widely introduced and almost lost to floriculture.

Lycoris Squamigera produces in early spring, attractive green foliage which grows until July, when it ripens off and disappears, and one

not familiar with its habits would think the bulb had died, but about a month later as if by magic the flower stalk springs from the ground to a height of two or three feet, developing an umbel of large and beautiful lily-shaped flowers 3 to 4 inches across and from 8 to 12 in number, of a delicate lilac pink shaded with clear blue. As the bulb is perfectly hardy, without any protection it can be planted in the Fall—the best time—as the bulbs will have a splendid chance to get established before flowering time. Cover the crown about four inches.

Very useful for the hardy border or among Shrubbery. 30c each; \$3.00 doz.; \$25.00 per 100.

Achillea Millefolia Cerise Queen. We might call this an improved form of the *Purpurea* with

a bright cherry-red color, well adapted for massing, grows twice the height of the *Purpurea*. 10c each; 75c doz.; \$5.00 per 100.

Aconitum Wilsonii. Novelty, recently introduced from China. The graceful flowerspikes attain a height of 6 feet, and produce many fine pale blue or violet flowers. It blooms from the beginning of September until the end of October. 15c each; \$1.50 doz.; \$12.00 per 100.

Actaea Japonica (Cimicifuga Simplex.) This pretty variety produces in late fall a large quantity of erect stems, with spikes of feathery white flowers. It blooms when there are but few other outdoor flowers. Very desirable plant. 15c each; \$1.50 doz.; \$12.00 per 100.

Anchusa Italica Dropmore Variety. Sterling novelty. The splendid flowers are of the purest blue imaginable and produced on branched stems, growing about 4 feet high. It is, doubtless the finest blue herbaceous plant in cultivation. 15c each; \$1.50 doz.; \$12.00 per 100.

Anemone Japonica Prinz Heinrich. New variety of dwarf compact habit, with very large semi-double dark-red flowers; the darkest double Anemone Jap. 10c each; \$1.00 doz.; \$7.50 per 100.

Anemone Japonica Purpurine. Novelty of recent introduction, with large semi-double deep purplish rose colored flowers, one of the very best. 15c each; \$1.50 doz.

Anemone Pulsatilla Alba (White Swan.) The beautiful white variety of the common *Pulsatilla*. 25c each; \$2.50 doz.

Anthericum Liliastrum Giganteum. This new and scarce variety produces stems of about 3 feet high, with pure white flowers of double the size of the ordinary *Anthericum*. 25c each; \$2.50 doz.

Hardy Aster. (Beauty of Colwall.)

Aster (Michaelmas Daisy), Beauty of Colwall.

Of all the varieties of Asters that have been raised for many years past, there are none that can approach in beauty the above novelty. The flowers are **perfectly double**, of a very pleasing shade of lavender, produced in great freedom on stout erect stems, about 4 feet high. It is of robust constitution, a good grower, and requires no staking or tying to keep in position. It has been unanimously awarded a First Class Certificate by the Royal Horticultural Society, and is unquestionably a most valuable acquisition to this family. Price, strong plants, **75c** each; **\$7.50** doz.

Aster Amellus Perry's Favorite. New variety with red flowers, the most beautiful color of this section. **15c** each; **\$1.50** doz.

Aster Mesa Grande Speciosa Grandiflora. One of the finest Asters in cultivation, being quite distinct, with large dark blue flowers in great abundance during July and August. It grows about 1½ feet high. **15c** each; **\$1.50** doz.

Aster Thompsonii. Very scarce, and unequaled as regards size and color of flowers, which are of the finest form and magnificent soft blue color. It flowers very early, viz. from the middle of July till late Fall. **25c** each; **\$2.50** doz.

Aster Thompsonii Nana. A dwarf variety of the above and a compact grower. **25c** each; **\$2.50** doz.

Aster Novelty. This variety grows about 2 feet high, and bears bright pink colored flowers of medium size in great profusion. Its semi-dwarf compact growing habit form a perfect mound which is literally covered with rosy pink flowers, one of the best. **10c** each; **\$1.00** doz.; **\$7.50** per 100.

Aster Sub=Caeruleus. A new hardy species from Northwest India. Handsome bright mauve Marguerite flowers, 3 inches across, each one having the contrast of a bold yellow centre borne

on long, straight stems, and invaluable for cutting. The plant forms a neat tuft of foliage close to the ground, from which the flower stems are thrown up. Not least among its merits is the fact that the plants bloom profusely in early June, height 2 feet. Award of Merit, R. H. S. June 20th, 1905. **10c** each; **85c** doz.; **\$6.50** per 100.

Auricula (Primroses). A European perennial, sending out short scapes, bearing flowers of many colors. It is one of the most famous of florists flowers, but has never received the attention in this country that it has in Europe. In this country generally treated as a greenhouse plant, but is hardy, and in the Old World is grown largely in frames. **15c** each; **\$1.25** doz.; **\$7.50** per 100.

Aquilegia Haylodgensis. Long spurred type. This is such an improvement over the ordinary Columbine that they must be seen to be appreciated. They contain light and dark blue, pink, white and red shades, long spurred unusually large flowers, and a bed in flower gives an iridescent effect that is difficult to produce with any other flower. Strong 2-year field roots, **12c** each; **\$1.00** doz.; **\$6.50** per 100. 3-inch pot plant, **10c** each; **75c** doz.; **\$5.50** per 100.

Aquilegia Helenae. Sky blue with white corolla, very long spurs, one of the prettiest, most vigorous growing and freest flowering of the Columbines. The flowers are of an exceptionally large size and beautiful form, a perfect gem. **10c** each; **75c** doz.; **\$5.50** per 100.

Aquilegia Coerulea. True species from the Rocky Mountains, bearing lovely blue and white flowers with elegant long spurs, height 1½ feet. We offer seedling from carefully saved seed, which ought to come true. **10c** each; **75c** doz.; **\$5.50** per 100.

Arenaria Caespitosa. Glabra. Forming a bright green carpet studded with tiny white flowers, height 3 inches. **10c** each; **75c** doz.; **\$5.50** per 100.

Aquilegia Haylodgensis. (Long Spurred Hybrid Aquilegia.)

Astilbe Davidii. This new Spirea of recent introduction from China has an elegant and tufted foliage and graceful flowerspikes of reddish purple color that grow upon stems of about 6 feet high. 10c each; 75c doz.; \$5.50 per 100.

Alyssum Saxatile Fl. Pl. (Double Perennial Alyssum) A beautiful new doubled flower form of the "Gold Dust" variety, producing masses of brilliant golden yellow flowers, height 6 inches. 15c each; \$1.25 doz.; \$7.50 per 100.

Anthemis Grandiflora. This is a great improvement over the original type as the flowers are very large, resembling a yellow Marguerite in size, form and color. 25c each; \$2.50 doz.

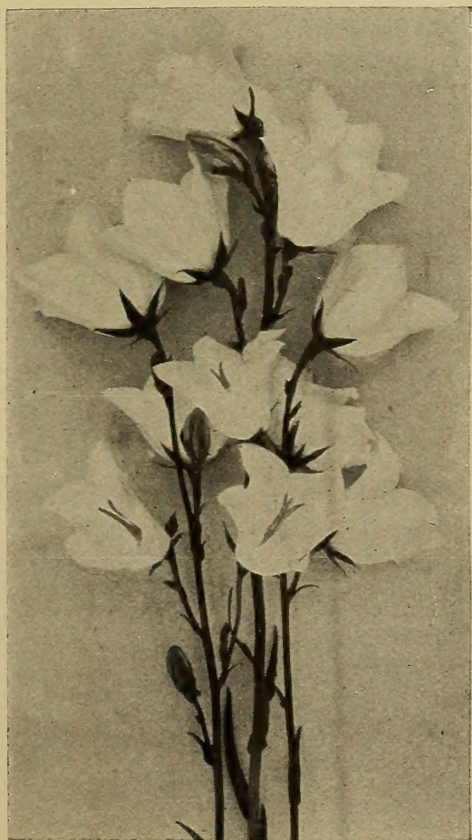

Anemonopsis Macrophylla. A new Hardy Perennial with pinkish red flowers somewhat like a waterlily in shape hanging on slender branches, leaves like an Anemone. 75c each.

Boltonia Latisquama Nana. A dwarf form of Latisquama, having all the characteristics of that variety, except that it does not grow higher than 15 to 18 inches and is covered with pretty pink flowers. A new and desirable sort. Makes a fine specimen plant, as it branches freely from the bottom of the stalks forming a complete bush. 10c each; 75c doz.; \$5.50 per 100.

Campanula Pyramidalis. It is singular that so handsome a variety as this should not be more commonly known and grown in all gardens. It requires no special treatment and yet throws flowerspikes 4 to 6 feet high, with numerous bell-shaped flowers and continues to bloom the entire Summer. In the vicinity of Lenox it is grown in tubs and large pots for veranda decoration. We offer plants of both the blue and white. Price of strong field plant, 12c each; \$1.00 doz.; \$7.50 per 100.

Campanula Persicifolia Humosa. This new Campanula originated in Europe some years ago. Its semi-double flowers, in form resembling the Camp. Moerheimi but still larger in size, and of the most beautiful blue color yet seen in this section.

The strong stems attain a height of about 4 feet and the large flowers are well placed on the long spikes. 15c each; \$1.50 doz.

Campanula Persicifolia Grandiflora.

Campanula Persicifolia Moerheimi. This splendid new Campanula is one of the best Hardy Perennials introduced in many years. It is a plant that soon has found its way all over the world, owing to its most beautiful, large, double snow-white flowers. 15c each; \$1.50 doz.

Campanula Persicifolia Alba Grandiflora. Flowers snowy white, fully twice the size of the old single white and of firmer texture, one of our finest hardy border plants and valuable for forcing and cutting purposes. 12c

each; \$1.00 doz.; \$7.50 per 100.

Campanula Latifolia Macrantha. Very handsome enormous drooping bells, of a fine satiny

lilac and deep purplish shades, height 3 feet. The flowers of this variety somewhat resemble Campanula Media (Canterbury bells) but being a true perennial it is more desirable than the latter sort which is a biennial and disappears after the first flowering season. 10c each; 85c doz.; \$6.50 per 100.

Chrysanthemums. New Hardy Double and Single Pompon Varieties. See General List of Perennials, pages 11 and 12.

Chrysanthemum Maximum Graf Kobbo. Of the large flowering varieties this doubtless is one of the best, with graceful, pure white flowers and a small yellow centre. 15c each; \$1.50 doz.; \$10.00 per 100.

Chrysanthemum Maximum Mrs. J. Tersteeg. This new variety is the tallest growing in commerce producing flowers stems of 3 to 4 feet high. The flowers are of a graceful shape and of an enormous size. It produces an immense quantity of flowers, which makes it very useful for cutting purposes. 25c each; \$2.50 doz.

Chrysanthemum Maximum Robinsoni. Striking novelty of medium growth, remarkable for its great freedom, and its beautiful flowers, cut into very fine segments, many of the petals beautifully fringed. 15c each; \$1.50 doz.; \$10.00 per 100.

Chrysanthemum Maximum Semiplenum. The semi-double large, pure white flowers are borne on long, strong stalks. It flowers a little later than the other varieties and the flowers stand the heat well. The hardiest of all. 15c each; \$1.50 doz.; \$10.00 per 100.

Chrysanthemum Nipponicum. A hardy Japanese species. A variety worthy of special notice and not well known. Large marguerite-like flowers, distinct, shrubby, with dark spiny foliage; flowering during Summer and Autumn, but in milder climates during the whole year. 10c each; 75c doz.; \$5.50 per 100.

Clematis Recta. This variety forms an erect bush or shrub, 3 feet high covered with small, pure white flowers during June and July. Nursery grown plants, 15c each; \$1.50 doz.; \$10.00 per 100.

Coriaria Japonica. New sub-shrub with long branches of some 3 to 4 feet high, with fine fresh green foliage, and bearing berries of a beautiful peculiar reddish-brown color turning black when ripening, very distinct. 35c each; \$3.50 doz.

Delphinium Albion. This new variety attains a height of 4 to 5 feet is a free grower and produces a well-formed spike; when fully expanded, the semi-double flowers are nearly pure white, with white eye, perfect in form and of great beauty. 50c each.

Delphiniums Sulphureum. (Zalil) A very handsome species from Afghanistan, with beautiful clear light yellow flowers; delights half shady situations, height 3 to 4 feet. 15c each; \$1.25 doz.; \$8.50 per 100.

Delphinium Belladonna. One of the finest Delphiniums in cultivation. It produces only 3 feet high spikes, on which the lovely sky blue flowers are borne abundantly. Flowers during the whole summer. 15c each; \$1.50 doz. \$12.00 per 100.

Delphinium Sinense Cineraria Coeruleum. Splendid novelty. The erect flower spikes are covered with a number of dark azure-blue flowers individually in appearance much like Cinerarias, being large and flat and without spurs. 15c each; \$1.50 doz.

Dianthus Plumarius Early Red. This novelty of recent introduction is in every respect a great improvement on Dianthus Plum. Rose de Mai, its color being of a finer red and it also flowers 2

to 3 weeks earlier. One of the best for cutting purposes. **25c** each; **\$2.50** doz.

Dianthus Napoleon III. (Mule Pink) Most authorities claim this variety to be the best of all the Hardy Garden Pinks, and whilst not new, it is not sufficiently well known or it would be grown everywhere, as it adapts itself to all locations. It is perfectly hardy and gives a continuous crop of bloom the entire season, the double flowers are clove-scented and their color is a deep blood crimson. **15c** each; **\$1.25** doz.; **\$7.50** per 100.

Dianthus Plumarius Furst Bismarck. (Mule Pink) This fine plant deserves to be widely known. It was sent out some years ago in Germany, but not being properly introduced it never came to the front. We have tried it and find it comes close to Napoleon III, the color being an equally bright shade of red. Its chief advantage appears to us to be its stronger constitution, whilst Napoleon III dies off very often, this variety stands admirably well. **15c** each; **\$1.50** doz.; **\$10.00** per 100.

Dianthus Latifolius Atrococcineus Fl. Pl. (Ever-blooming Hybrid Sweet William) A beautiful Summer bedding variety, producing masses of brilliant fiery crimson flowers throughout the entire season. **10c** each; **75c** doz. **\$5.50** per 100.

Dictamnus Caucasicus. This new large flowering variety is a great improvement on the common Fraxinella. Its flower spikes are about double the length, which are raised high above the foliage. **20c** each; **\$2.00** doz.

Eupatorium Coelestinum. The flowers of this native plant are a decided blue and resemble closely the Ageratum. We especially recommend Coelestinum as being a most desirable late flowering perennial, height 18 to 24 inches. **10c** each; **75c** doz.; **\$5.50** per 100.

Gilia Coronopifolia. A very handsome half-hardy biennial, bearing large spikes of brilliant scarlet flowers $2\frac{1}{2}$ to $3\frac{1}{2}$ feet in height, with elegant Larkspur-like foliage. Awarded a certificate of merit by the R. H. S. London, last Summer and created great interest and admiration where exhibited. Seeding plants, **50c** each; **\$5.00** doz.

Gypsophila Paniculata Fl. Pl. This beautiful plant is considered the best novelty raised in the last few years, grows about $3\frac{1}{2}$ feet high and its pure white flowers are perfectly double. Valuable for cutting and a most desirable addition to the hardy border. **25c** each; **\$2.50** doz.

Gypsophila Repens Monstrosa. With larger flowers than the other Gypsophilas. It flowers also a month earlier, has a very elegant habit, and is therefore very useful for cutting. **12c** each; **\$1.00** doz.; **\$7.50** per 100.

Helenium Pumilum Magnificum. A fine cross between H. Pumilum and H. Autumnale Superbum. It grows $2\frac{1}{2}$ feet high and produces a great number of large yellow flowers from June till Autumn. Reward of Merit R. H. S. **12c** each; **\$1.00** doz.; **\$7.50** per 100.

Iberis Sempervirens "Snow Queen." A quite distinct and improved sort. The foliage being a darker green and the flowers much larger than the type. Strong plants from pots, **15c** each; **\$1.50** doz.

Incarvillea Grandiflora. (New) This is a rare and highly desirable plant of recent introduction. It differs from the now well known Delevayii by its much larger flowers and its more compact growth; moreover the

color is much deeper crimson red, whilst the flowering season is also 2 to 4 weeks earlier than the Delevayii and lasts 3 weeks longer. The propagation is by no means as quick as the Delevayii, the seeds take longer to germinate. **25c** each; **\$2.50** doz.

Iris Siberica Snow Queen. An exquisite new hardy Iris, flowers of snowy whiteness, large and well formed, produced in great abundance, foliage light and graceful, height 3 feet, a grand Iris for flower border on waterside. **15c** each; **\$1.50** doz.

Iris Pallida Dalmatica. A fine and most distinct form of erect habit, recently introduced. Its glaucous leaves are of strong growth. Large flowers of lavender blue. **15c** each; **\$1.50** doz.

Hemerocalis. Yellow Day-Lilies. We give below several varieties of recent introduction, all of which are so great an improvement over the older varieties of the Yellow Day-Lily, such as, Fulva, Flava, and Dumorterii that the contrast in size is as marked as that between our Native Lilies and those of Japanese origin. A collection of the following varieties make a most attractive and continuous display.

Hemerocalis Apricot. Flowers clear, bright orange-yellow. **15c** each; **\$1.50** doz.

Hemerocalis Aurantiaca Major. The largest and best of this family, but rather tender. Rich orange. **25c** each; **\$2.50** doz.

Hemerocalis Gold Dust. Deep rich orange yellow flowers. **12c** each; **\$1.25** doz.

Hemerocalis Orange Man. Large, clear, bright orange flowers. **12c** each; **\$1.25** doz.

Hemerocalis Soverign. Very large rich orange-yellow, bronzy outer petals. **12c** each; **\$1.25** doz.

Hemerocalis Florham. Produces very large golden yellow, sweet scented flowers, during June and July. One of the best. **15c** each; **\$1.50** doz. **\$10.00** per 100.

Lupinus Polyphyllus Moerheimi. This is one of the finest novelties. It flowers throughout the Summer. The fine long spikes of pink and white colored flowers make it a grand acquisition for cutting purposes, as well as for the border. **15c** each; **\$1.50** doz.; **\$10.00** per 100.

Lathyrus Latifolius White Pearl. (True, no seedlings). The most beautiful of all Everlasting Peas with pure white flowers, which are about double the size of the ordinary Lathyrus Latifolius Albus. **20c** each; **\$2.00** doz.

Lobelia Queen Victoria Atropurpurea. This is a variety of our native Cardinal flower, and has the same habit of growth, but the foliage is a deep,

New Everlasting Sweet Peas. Lathyrus—White Pearl.

glistening bronze, almost black, which makes it singularly handsome and striking either in a group or mixed border. The flowers which are a deep cardinal red are borne in great profusion on spikes 2 feet high until frost. 15c each; \$1.50 doz.; \$10.00 per 100.

Lychnis Chalchodonica Fl. Pl. Double flowering form of the type, having flower heads of vermillion-scarlet on erect stems 3 feet high, one of the choicest hardy plants of recent introduction. 15c each; \$1.50 doz.

Lychnis Semperflorens Plena. (The True Double Ragged-Robin) If we were asked to name the Hardy Perennial that could be put to most use, we do not know another that has more to recommend it than this one. It flowers continuously from Spring until late Fall. The flowers which are very attractive are of a bright pink color and borne in great numbers on stalks 12 to 18 inches long. As a border plant it has no equal, but makes the best showing when grown in mass. The delicate color and construction of the sprays of bloom make it one of the best for table decoration. It does admirably well as a pot plant and will stand gentle forcing. It is perfectly hardy and succeeds anywhere with the least attention and the smallest plant will flower. Price, 12c each; \$1.00 doz.; \$7.50 per 100.

Ligularia Stenocephala. Very decorative foliage plant, with large bronze-green leaves, producing flowerspikes of some 3 to 4 feet high with beautiful golden yellow flowers. Recommendable fine garden plant. 25c each; \$2.50 doz.

Monarda Didyma Violacea Superba. Distinct novelty, in habit equally decorative, but the color of flowers differ from others of the type, being a rich violet purple. 15c each; \$1.50 doz.; \$10.00 per 100.

Meconopsis Cambrica Fl. Pl. The double orange yellow Welsh Poppy. A very handsome and rare plant, with orange yellow flowers which are perfectly double. It flowers continuously throughout the Summer. 25c each; \$2.50 doz.

Onopordon, Robert Bruce. A cross between the Scotch Thistle, Onopordon Acanthium and Onopordon Arabicum, resulting in a large, handsome ornamental plant of branching habit, with bold grayish foliage elegantly cut, and silvery prickly flower stems. 25c each; \$2.50 doz.

Physalis Bunyardi. (New) Rich scarlet capsules; medium size, not quite so large as Franchetti, but more pointed and richer in color. 15c each; \$1.25 doz.; \$10.00 per 100.

Oenothera Speciosa. A pure white flowering evening Primrose that blooms profusely from June until frost. The flowers somewhat resembles a single Petunia, are sweet scented and unlike the type they remain open at all times. A most satisfactory plant for the border, grows about 12 inches high. Strong plants, 10c each; 75c doz.; \$5.50 per 100.

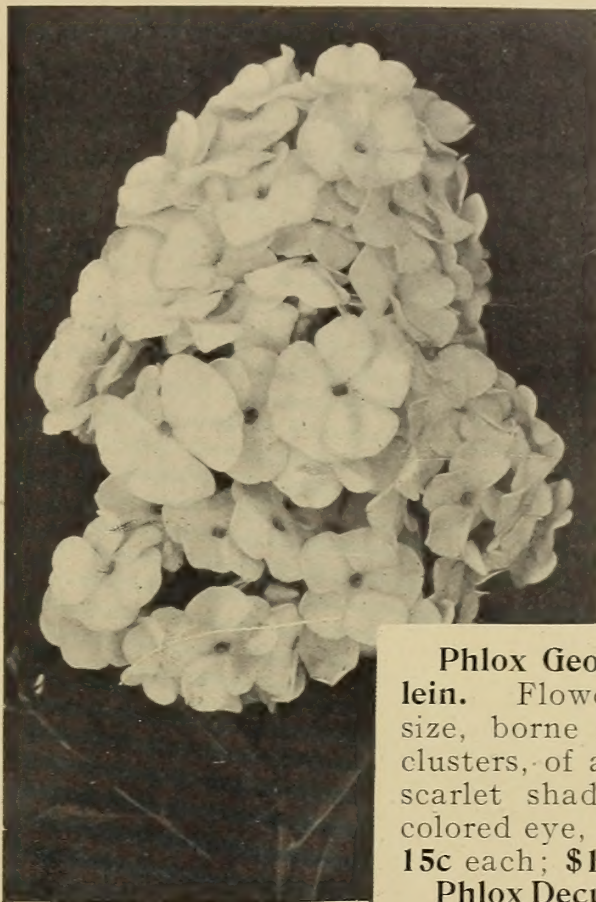

Pentstemon Grandiflorus. We consider this variety the best of the Hardy Pentstemons. Its 2½ feet stout spikes of bloom much resembles the Foxglove in color, size and habit of growth. The leaves which are thick and broad are a dull green, passing into grayish-blue, and is a singularly attractive plant for either the border or planting in mass, as it retains its foliage being almost an evergreen. 12c each; \$1.00 doz.; \$7.50 per 100.

Papaver Orientale Princess Victoria Louise. Beautiful new variety with pure rose flowers. The best of the rose colored varieties. 15c each; \$1.25 doz.; \$7.50 per 100.

Phlox Amoena Fol. Var. Very pretty form of the well known charming early flowering Phlox

Amoena with beautiful variegated leaves. A lovely plant even when not in flower. 15c each; \$1.50 doz.

Phlox Decussata Elizabeth Campbell. Very large spikes with flowers of quite a new color, light salmon changing to pink in the centre. 25c each; \$2.50 doz.

Phlox General Van Heutsz.

Phlox Decussata General Van Heutsz. This produces immense trusses of enormous flowers, which are of the most brilliant salmon-red color with white centre. 10c ea.; \$1.00 per doz.; \$7.50 per 100.

Phlox George A. Strohelein. Flowers of great size, borne in enormous clusters, of a fine orange scarlet shade with deep colored eye, height 3 feet. 15c each; \$1.50 doz.

Phlox Decussata Hanny Pfeleiderer. Cream colored changing to salmon in the centre with carmine red. 25c each; \$2.50 per doz.

Phlox Decussata Mad. Paul Dutrie. Soft pink color, resembling the shade of a Cattleya suffused with white. 25c each; \$2.50 doz.

Phlox Decussata Selma. A new variety. It has a strong habit, and produces large trusses of very large pink flowers with cherry red eye. 15c each; \$1.50 doz.; \$7.50 per 100.

Phlox Divaricata Laphami. (Perry's Variety) Most beautiful and distinct variety of the Divaricata or Canadensis class, recently introduced. The flowers are much larger and brighter in color than those of Phlox Divaricata. It is of a strong growing habit and flowers most abundantly from the middle of April till the end of July. 15c each; \$1.50 doz.

Polemonium Coeruleum Fl. Albo. Fol. Var. One of the finest Herbaceous Plants with variegated leaves. It is a very old garden plant, but it has become rather scarce. 15c each; \$1.50 doz.

Polygonum Baldschuanicum. One of the most lovely new hardy climbers for poles, arbors, trellises, etc. Throughout Summer and Autumn it is smothered with innumerable lovely feathery white flowers, borne in graceful sprays, and invaluable for cutting. 50c each; \$5.00 doz.

Primula Cortusoides Sieboldi. (Japanese Primrose) A charming class of Primulas, bearing large bold heads of graceful flowers, in color ranging from pure white, delicate blush-pink, and soft rose to the most intense crimson, delicate mauves, and lavender blue shades. They are quite hardy, thriving in any shady sheltered border; for shady parts of the rock garden they are gems. They delight in a light soil and well decayed manure. Plant in Autumn or early Spring. As pot plants in a cool conservatory they have few rivals in the Spring and Winter months. They always attract great attention in the European flower

shows. 12 named sorts. Price, Separate colors or in mixtures, 15c each; \$1.50 doz.; \$9.00 per 100.

Primula Acaulis Pompadour. Old but very rare form, most beautiful dark crimson double flowers. 50c each.

Primula Auricula Alpine. See Auricula.

Rehmannia Angulata. A half-hardy herbaceous perennial, recently introduced from Central China. The flowers which are freely produced on the upper third of the branches, resemble individually those of *Incavillea Delavayii*; they are 3 inches in diameter; rose-purple in color, with a rich yellow throat spotted with purple. The plants are of easy culture. The flowers are almost as large as a *Gloxinia*, 15c each; \$1.25 doz.; \$8.50 per 100.

Rehmannia Pink Beauty.

Rehmannia Angulata, Pink Beauty. The large flowers are of a clear bright pink color, with a distinct pale throat, the markings of which vary considerably. 25c each; \$2.50 doz.

Salvia Pittieri. This pretty *Salvia* was introduced some years ago. It forms well-branched and compact growing bushes about three feet high and stands all the Summer in full bloom. The flowers are of a vivid cochineal-red standing on dark, rather bluish hued stems, and even the cups in which the yet unopened flowers stand are quite dark. 15c each; \$1.50 doz.; \$10.00 per 100.

Salvia Turkestanica. An exceedingly decorative new plant, producing in midsummer, long and graceful panicles of white flowers, intermixed with bracts of the same color edged light pink. The plants grow over 3 feet high and its large crimped foliage gives it a most picturesque appearance. Although a perennial and quite hardy, it is best grown as a biennial and is partial to light soil. Very ornamental in large beds and on lawns. It was awarded a certificate by the R. H. S., London Eng. 15c each; \$1.50 doz.; \$10.00 per 100.

Senecio Clivorum. With enormous round leaves resembling somewhat the gigantic *Petasites* and with pure yellow flowers borne on stems 3 feet high. 25c each; \$2.50 doz.

Sidalcea Rosy Gem. Beautiful new variety remarkable for its graceful spikes of rosy pink flowers. 15c each; \$1.50 doz.

Spiraea Aruncus Kneiffi. A new variety, being quite distinct from all existing kinds. It is of bold, but graceful habit, attaining a height of about 3 feet, with finely divided fern-like foliage and a mass of pure white flowers, which are borne in graceful feathery sprays. 15c each; \$1.25 per doz.; \$10.00 per 100.

Sedum Spectabilis Atro-Purpureum. A handsome plant for the border or rock garden, foliage of a dark coppery purple shade, height 1 foot. 15c each; \$1.25 doz.

Thalictrum Adianthifolium. The foliage of this plant so closely resembles the Maidenhair Fern that it is often mistaken for the latter when seen growing in the Nursery beds. It makes a very beautiful plant, is quite hardy, and grows about 9 inches high. 10c each; \$1.00 doz.; \$7.50 per 100.

Trollius Asiaticus Fl. Croceo. (True) This plant is very scarce. The flowers have a very fine, dark orange color, and its form is between *T. Japonicus* and *T. Caucasicus*, Orange Globe. 15c each; \$1.50 doz.

Trollius Japonicus Excelsior. This variety is a great improvement on the well known *Japonicus* from which it differs by its better color. A very free flowering variety. 15c each; \$1.50 doz.

Tunica Saxifraga Fl. Rosea Pl. A rare, double variety of a neat little alpine being, from June till Autumn, covered with an immense quantity of pretty double blush flowers. It is a charming little plant, for the rocky garden and said to be quite hardy. 50c each.

Veronica Longifolia Subsessilis. Is destined to create as much favor in the flower world as did the Golden Glow. It is the handsomest blue flowered plant we know of, growing to a height of 2 feet and completely studded with its spikes of blue flowers. Its flowers are fine for cutting, it is perfectly hardy and increases in strength and in beauty each succeeding year. It makes the best and ideal blue flowered hardy border plant obtainable. Price, large field clumps \$6.50 per 100. \$1.00 doz.; 10c each. First size plant, \$5.50 per 100; 75c doz.; 8c each. Second size plant, \$4.50 per 100; 60c doz.

Veronica. Gentianoides Folia Variegata. An exceedingly ornamental hardy plant. The glossy foliage is striped and margined white and green. Dwarf compact growth. Spikes of flowers 1 foot long of a light blue color, in Spring, very useful for cutting. 15c each; \$1.50 doz.

Althea, Crested Beauty. (A new Hedge Plant) There are positions where a flowering hedge is very desirable and the new *Althea Crested Beauty* is an ideal shrub for this purpose. It is a vigorous grower, its foliage is of a rich dark green, it bears extremely close shearing blooms very profusely for three months, at a season when few other shrubs are in bloom, and it not only makes a grand display as a mass, but the individual blooms, of the purest white set off by the rich dark glistening crimson radiating from the centre bear close inspection as well. It is also the best *Althea* in cultivation for specimen plants. Field plants, 2 to 3 feet, 20c each; \$1.75 doz.; \$12.00 100. 3 to 4 feet, 25c each; \$2.00 doz.; \$15.00 per 100.

White Baby Rambler Rose. The White baby Rambler Rose, Katherine Zeimet, is an interesting variety and we think it will become a general favorite. It is a good grower, with clean fresh foliage growing freely. Its flowers are pure white, with the fragrance of the Hyacinth, and are per-

fectly double. It will be welcomed for its color and its floriferousness. Strong field 2-year old plants, **25c.** each; **\$2.50** doz.; **\$20.00** per 100. 2 ½ in pots, **10c** each; **85c** doz.; **\$6.50** per 100.

Azalea Canescens. This new candidate for favor is a large shrub growing from 4 to 15 feet high and symmetrical in form, but it blooms when quite small and very freely. It is a woodland species but flourishes in the open and adapts itself to different soils and exposures. It is found in both wet and dry places and in peaty soils, and seems fully at home in old, worn out pastures on bleak hillsides.

Its distinguishing features are its bright rose-pink color and its delicious fragrance, which is that of the common garden pink and fills the air all around. It takes kindly to cultivation and is equally useful on the lawn and in open woodland. Plants 1 to 2 feet high, **25c** each; **\$2.50** doz.; **\$20.00** per 100. 2 to 3, **30c** each; **\$3.00** doz.; **\$27.50** per 100. Large specimens well established, **\$2.50** each.

Hydrangea Arborescens Grandiflora. This hydrangea is certainly a grand acquisition for general garden purposes and is sure to be tremendously popular as soon as better known. Its value as a forcing and tub plant is little realized so far. It forces with the greatest ease and can be had at Easter and Decoration Day, or it may be retarded and brought on later for general decorative purposes as a tub plant. Its purest white blooms and deep green foliage present an effective contrast. Then again the blooms, after a period of pure white, slowly assumes light green tints, later maturing into deep green, and all these color changes look well. One year field grown plants if potted in five or six inch pots, will make plants producing from four to five great flower heads, with the treatment usually given the Hortensis type.

Field plants 15 inches and over, **50c** each; **\$5.00** doz. Field plants 10 to 15 inches and over, **25c** each; **\$2.50** doz. Plants from 3 inch pots, **15c** each; **\$1.00** doz.; **\$6.00** per 100.

Daphne Cneorum. Garland Flower. A charming little alpine plant, a gem for rockwork, garden border or ground cover, with creeping stems, covered with small, dark, evergreen leaves, and heads of fragrant, rose-colored flowers, which make the plants a carpet of pink, during the spring. Strong plants, 5 inches high, 6 inch spread, **75c** each; **\$7.50** doz.; **\$50.00** per 100.

Andromeda Floribunda. Mountain Fetter Bush.

This is one of the most attractive of our native evergreen. It is a low-growing shrub, compact and dense. Its rich, dark foliage remains during the entire year, and is lighted up in early spring by numerous small spikes of white bell-like flowers, which last in good condition for many weeks. For foreground, especially under or in front of larger evergreens, or for specimen plants, there are few plants that exceed this aristocratic shrub. Strong plants, 12 to 18 inches, **\$1.75** each; **\$17.50** doz.

Cranberry. The Hardy American. *Vaccinium Macrocarpon.* Although found growing wild in bog and on moss land, will adapt itself and thrive in any ordinary good soil. Not only this, but under

cultivation it makes a solid carpet in a season or two if planted 6 inches apart and produces abundant bright scarlet fruit, which persists until late winter or spring. In spring the coloring is a bright

Cranberry, Hardy American.

green, but as autumn approaches the dense evergreen foliage turns brilliant shades of bronze. It will be found a very good substitute for Dwarf Box for edging and for Rhododendron or shrub border, or along streams and shores of ponds it is extremely desirable, lighting up dark evergreen foliage in a charming way and effectually holding banks from washing.

On a large estate near Boston 20,000 plants were used in this way after previous extensive trials. Prices of strong clumps, **15c** each; **\$1.50** per doz.; **\$10.00** per 100.

Dahlia Jack Rose, Decorative Variety. The floral sensation of the season, combining every good quality found or desired in Dahlias. The flowers are large to very large, specimen blooms measuring 6 to 7 inches across and 4 inches deep, with a full high centre; the outer petals reflex to the stem as the flower fully expands. Same color as a Jack Rose. Plants, **50c** each; **\$5.00** doz.; **\$35.00** per 100.

New Show Dahlia, Charles Lanier. Of very large size with a high, round full center and long stems. The color is very deep yellow with enough orange shading to make it appear yellow under artificial light, whereas, most yellow varieties appear white in such situations. This gives it a special value for cutting. Plants, **20c** each; **\$2.00** doz.; **\$15.00** per 100.

New Cactus Dahlia, Perlhilde. This is a sport from the well known Kriemhilde and is like that favorite except in color which is white suffused with a faint blush, occasionally coming pure white. This is one of the most profuse bloomers, equalling Krimhilde, but with that variety should be planted about two weeks earlier than other sorts. Plants, **15c** each; **\$1.50** doz.

ANGLO-AMERICAN LAWN GRASS SEED MIXTURE

The formula used in the preparation of the Anglo-American mixture is based upon that used in England for making the celebrated lawns of that country.

Lawn Grass is sometimes quoted by the standard bushel of 14 lbs., which is confusing and which should be borne in mind when comparing prices, as 14 lbs. of our Lawn Grass Seed would cost but **\$2.45**.

PRICE OF THE ANGLO-AMERICAN LAWN GRASS SEED: Per quart, 15c.; 4 quarts, 55c.; ¼ bushel of 5 lbs., \$1.00; 1 bushel of 20 lbs., \$3.50. One-half bushel at bushel rates.

General List of Hardy Perennials

INTRODUCTORY REMARKS AND TERMS

The plants offered herein are all sturdy, either nursery grown or established in pots, and can be depended upon being true to name and giving effect by flowering satisfactorily the first season.

Our stock of plants is reasonably large, having 30 acres in cultivation and upwards of 500,000 plants to draw from. We make a specialty of supplying Landscape Gardeners, Dealers and others in the trade.

We print real prices, which as long as unsold and without engagement, we are willing to accept. The prices are net, except being subject to five per cent. when cash accompanies order, otherwise payable in thirty days from date of invoice on approved credit. Packing charges at cost, f. o. b. Sparkill, N. Y. To meet reputable competition, we will reduce our prices still further on being given the opportunity.

Six of one kind furnished at dozen rates, 25 at 100 rates, 250 at 1000 rates, unless otherwise specified.

Clumps, (or Plants of Extra Large Size) can in most cases be supplied at double the prices named, which are for ordinary size plants. These Clumps (or extra large Plants) will only be sent when specially ordered.

ACONITUM (Monkshood)

Handsome herbaceous plants, with bold spikes, of hood shaped flowers, very effective in flower borders, shrubberies and rock-gardens, thriving anywhere, either in sunny or shady aspect, height 4 to 5 ft. summer and autumn flowering. Care should be taken that the Aconitums are not planted near the, or in the, kitchen garden, where their tuberous roots might accidentally be used for food, as they are poisonous. Plant in Autumn or early Spring.

JAPANESE ANEMONES: (Anemone Japonica)

These rank among our showiest and most useful of late summer and autumn flowering hardy border plants. The white Anemone Japonica Alba has long been a favorite in old-fashioned gardens. For cutting, all are of inestimable value, as they come in at a season when hardy flowers are in demand and getting scarce. They are perfectly hardy, and thrive in any ordinary flower border, while when massed and naturalised in woodlands and shrubberies, a few plants are more beautiful.

BEAUTIFUL PERENNIAL ASTERS. (Starworts or Michaelmas Daisies)

Michaelmas Daisies now fill a most important place in all hardy gardens, lighting up the borders and shrubberies with their masses and clouds of dainty and brightly colored blossoms throughout the Autumn months up to November when other flowers are scarce. To cut for vases and church decoration, etc. they are invaluable, providing, as they do an inexhaustible supply of bloom. The dwarf and more slender growing kinds deserve prominent positions in the choice border and rock-garden.

Our collection enumerated below includes many handsome new forms which are advances upon the older varieties, both in quality of flower and habit of growth, and their value for cutting.

For the convenience of purchasers we have indicated the relative earliness or lateness of the various Michaelmas Daisies offered by adding after the name (1) (2) (3). (1) denotes those varieties commencing to bloom at the end of July and continuing decorative throughout August; (2), varieties opening their blooms in September. (3), those varieties which commence flowering in October.

Price of strong plants from 3 in. pots that will make a profusion of bloom the first season planted, 10 cents each; 75 cents per dozen; \$5.50 per 100. except where otherwise noted

Perennial Aster, or Michaelmas Daisies.

For price of Asters see previous page

ASTERS: Hardy, or Michaelmas Daisies.

Amellus, Perry's Favorite. (New. See Novelties)... 15c. each \$1.50 doz.

Amelius Elegans. (2) Deep violet-blue, well formed flowers; height 2 ft.

Amethystinus. (3) Producing small bright lilac flowers, height 4 ft.

Acris. Bright lilac-purple flowers in great profusion, bushy habit; height 2 ft. (1).

Chapmanii. Light argeratum blue, very graceful, large sprays, 5 ft. (2).

Colarette. Large rosy blossoms; height, 2 ft. (2).

Datschii. Pure white, 3 ft. (3).

Ericoides Clio. True, charming long, graceful sprays of small bluish, daisy-like flowers, very distinct; height, 3 ft. (2).

Forget-Me-Not. This variety grows about two feet high, has strong, stiff stems, branched and covered with myriads of small daisy-like flowers; white with a brownish eye, a very attractive sort. (2).

F. W. Raynor. Light reddish violet; 4 ft. (2).

F. W. BRUBIDGE. Large soft heliotrope flowers, very fine; height 4 ft. (2).

Gertrude. Foliage small and fine, habit graceful, smothered with a profusion of small, dainty, clear, purple flowers (1).

Grandiflorus. Best and largest, dark violet flowers, late and free bloomer; height 2½ ft. (3)... 15c each; \$1.50 per doz.; \$10.00 per 100.

Laavis. Long sprays of large, deep, blue flowers, light graceful habit, extra fine; height 4 ft. (2).

Laavis Calliope. Large spreading heads of rich lavender flowers; height, 4 ft. (3).

Longifolia Formosissima. Large, deep rosy lilac flowers, erect habit, fine distinct variety; height 4 ft. (2).

Mad. Sayneuse. Pale lilac, very free; 15 in. (3).

Melpomene. Tall (5 ft.), large purple flowers, in long graceful sprays. (2)

Mesa Grande Speciosa Grandiflora. (New See Novelties) 15c each \$1.50 per doz.

Novae Angliae. Bright purple violet; 4 ft. (3).

Novae Angliae Rosea. Bright purplish mauve; 4 ft. (2).

Novae Angliae Rubra. Deep reddish violet; 4 ft. (2).

Novelty. (New, See Novelties)... 10c each \$1.00 per doz.; \$7.50 per 100.

ASTERS.—Continued.

Ptarmicoides. Small, pure white flowers, erect dwarf habit; height, 1 ft. (1). This is a continuous bloomer and makes a desirable border plant.

Polyphyllus. Elegant foliage, small white flowers with lemon centers, very effective; 4 ft. (1).

Robert Parker. Large sprays of beautiful large soft lavender blue flowers with yellow center, extra fine; height, 5½ ft., a valuable cut flower (2).

Snowflake. Pure white, very free; 1½ ft. (2).

Shortii. Long, graceful sprays smothered with small bright lilac flowers, valuable for cutting; an exceedingly beautiful plant; height 3½ ft. (1).

Sub-Caeruleus. (New. See Novelties)... 10 each; .85 doz. 6.50 per 100

T. S. Ware. Light blue, one of the best of this color; 3½ ft. (2).

Trinervis. Rich violet purple, distinct large foliage, 1 to 2 ft. high (3).

Thompsonii. (New. See Novelties)... 25c each; \$2.50 per doz.

Thompsonii Nona. (New. See Novelties)... 25c each; \$2.50 per doz.

Top Sawyer. Large lilac flowers of perfect shape; 4 ft. (2).

Versicolor. Small white flowers changing to rose, erect branching habit, height, 3½ ft. (2).

White Queen. Large white free flowering variety; 4 to 5 ft. (3).

Wm. Bowman. Large purple flowers on stems 3 ft. high. A late continuous bloomer, one of the latest to bloom and has flowers equal to any in size. (3).

Aster. Dwarf Alpine Varieties. July flowering, charming for rockwork 6 to 9 inches.

CHRYSANTHEMUM MAXIMUM: (The

Shasta, or Giant Moonpenny Daisy)

The following forms of this fine species rank among our best, showiest, and most valuable hardy summer-flowering border plants; for cutting they are invaluable, their large snowy white, daisy-like flowers last long in water, while in the border they make elegant bushes, smothered in blossom; all quite hardy and suitable for any ordinary garden soil. July and August flowering.

CHRYSANTHEMUM HARDY POMPON

These hardy Chrysanthemums now take an important place among border plants for general out door decoration from Summer to Autumn. Their bright and attractive flowers which are produced in great abundance, are much valued for cutting during the late Summer months and considerably lighten up the hardy border at that season of the year. They make also charming pot-plants for indoor decoration.

Our collection enumerated below is a careful selection of what we consider the best of the standard sorts and newer introductions.

Each Doz. 100
CHRYSANTHEMUMS.—Continued.

New Early Blooming Hardy Double Pompon. Ready to cut by middle of October. Strong plants of these New Varieties in 3 in. pots 10c each; 75c per doz.; \$5.50 per 100 except when noted.

Alma. A beautiful pink variety, like a miniature Mrs. Perrin; flowers large for a Pompon, and plant 3 ft. high. A beauty.

Baby. Grows only a foot high, with hundreds of little golden yellow double flowers, 3/4 in. in diameter, quilled petals; it has delightful fragrance.

Elva. The most beautiful of white pompons, pure in color, of full, fluffy form; very early; extremely useful to every grower of cut flowers.

Geo. Meadows. This is a pompon variety that blooms constantly from early summer until frost and might be termed a summer flowering chrysanthemum; flowers very profusely; double cream white.

Baby Margaret. (New) A pure white sport from the charming little yellow "Baby."... 35c each; \$3.50 per doz.

Inga. Bright red of beautiful shade, fine size and elegant form; one of the earliest.

Waco. Creamy white, shading to yellow; incurving petals, rather large blooms.

Single Pompon Chrysanthemum.

HARDY DOUBLE POMPON: Older Varieties.

Each Doz. 100
 Strong plants from 3 in. pots..... .08 .60 3.00
 Varieties marked "But." have small round button shaped flowers. Those marked, "Lg." have larger or Aster-like flowers.

Anna Maria. Creamy white, tipped pink. But.

Climax. Deep rose. But.

Denizula. Long sprays violet pink. Lg.

Elegantha. Deep pink, white edge. But.

Fred Peele. Light lilac, foliage scented. But.

Globe D'Or. Dwarf, bushy; clear yellow. Lg.

Goldfinch. Gold, shaded crimson. But

Hamlet. Violet red. But.

Kadar. Bronze crimson, yellow centre. Lg.

Lyndhurst. Bright, crimson maroon. Lg.

Prince of Wales. Pure white. Lg.

St. Illoria. Silvery pink. Lg.

Rhoda. Pink, shaded white. But.

Tennyson. Pure yellow. But.

Older Hardy: Single Pompon.

Aaron. Bronze scarlet.

Clara. Pearl white.

Princess of Thule. Orange red.

Rosy Morn. Silvery pink.

Wallis. Pure yellow.

CHRYSANTHEMUMS: NEW SINGLE HARDY POMPON

For growing in bush form or sprays. (From a celebrated English Specialist's Collection.) Strong plants from 3 in. pots..... 10c each; 75c per doz.; \$5.50 per 100.

Lady-Smith. E. G. Hill & Co. say this is one of the prettiest they have seen. Flowers about Oct. 15th; completely covered with bright pink flowers which are extremely lasting.

Louis Bowers. Yellow; enormously free.

Merstham White. Large pure white; disbud slightly.

M. J. Osborne. Large pink, white eye.

CHRYSANTHEMUM: HARDY LARGE FLOWERING DOUBLE JAPANESE.

The stock from which these varieties are grown, was taken from an old-fashioned garden where they had stood the severest winters. They are the best we have yet seen of this type—being large and perfect flowers. We can offer four colors. Plants in 3 inch pots.

DELPHINIUMS HYBRIDS: (Perennial Larkspurs)

These handsome stately border-plants produce long bold flower spikes, ranging in color from the palest sky blue to the darkest shades of Indigo and violet, some having a tinge of rose, pink, or purple and the bee like-centres, varying from pure white to brown, and bronzy. Some of the varieties are remarkable for their large single flowers, others for their very double or large, semi-double flowers. When grown in bold groups, whether in beds, herbaceous borders, or shrubberies, few plants are so striking, or produce a more brilliant effect during the summer and early autumn months, especially when they have become established.

Plumarius Varieties. Hardy garden

Carnations or Pinks.

These come into flower before the more tender Carnations, and remain decorative a long time; being very sweet-scented and abundant bloomers, they are greatly valued for cut flowers. No garden should be without these Pinks, which are perfectly hardy and of very easy culture. As bold edgings to flower borders they are admirably adapted, their grayish foliage harmonising well with other colors. Plant in early autumn or spring.

IRIS. Fleur-de-Lys

The Iris is the "Orchid" of the flower garden; its blossoms are the most rich and varied in color of hardy plants. It should be extensively planted in flower and shrubby borders and wild gardens. When established, the plants yield a great quantity of bloom.

There are few hardy plants more useful and so decorative either for beds, groups, or as cut flowers. This is particularly so with the Japan section, it being quite common to find flowers measuring over six inches across, and their being perfectly hardy, increase in beauty from year to year, with very little attention.

JAPANESE IRIS. (Iris Kaempferi.) or the Clematis-like Iris of Japan. The magnificence of these splendid new Japanese Irises surpass any written description that we could give of them. The large flat flowers measure 6 to 8 inches in diameter, with a breadth of petal 3 to 3 3/4 inches; the prevailing colors are white, red-purple crimson, rose, lilac, lavender, French gray, purple, violet, and blue, each flower usually representing several shades. Season of blooming is from June to August.

PÆONIA SINENSIS.

Pæonies Sinensis. Double Chinese Pæonies. These magnificent Pæonies bear large and handsome flowers in summer, varying in color from pure white

to blush, rose, pink, and bright and deep crimsons, while most of them are deliciously rose-scented. They are of simple culture, succeeding in any ordinary garden soil.

The planting season for Pæonies is from September to April; those planted in September generally bloom the following summer.

PÆONIES SINENSIS SINGLE. (Chinese Pæonies.)

These single Chinese Pæonies are much prized for cut flowers, having flowers of great beauty, ranging in color from snowy-white through all shades of blush pink, and rose, to the deepest and richest crimsons. They bloom in June, and are exceedingly decorative plants for herbaceous borders and to intermingle with shrubs, etc.; for shaded walks they will be much prized.

CHINENSIS SINGLE: Pæonies.

Single and semi-double flowers in mixture..... .50 ea. 5.00 doz.

PÆONY OFFICINALIS Beautiful Hardy Double European Pæonies. Early Flowering.

These Pæonies are very old inhabitants of our garden and at the present day, like many other old-fashioned flowers are being generally appreciated, and well they may. In partially shady groves these European Pæonies thrive and are happy; while in beds or as single specimens they are exceedingly effective.

	Each	Doz.	100
Old Double Red. (Officinalis Rubra.) Large handsome rich crimson flowers.....	.10	1.00	7.50
Old Double Rose. (Officinalis Rosea.) Flowers full rose, passing off flesh color.....	.15	1.35	10.00

PÆONY TENUIFOLIA. The Fennel-Leaved Pæony.

A remarkably distinct and beautiful plant, with large crimson flowers nesting amongst a graceful feathery foliage; it is dwarf and compact in habit, and altogether a most valuable border plant.

	Each	Doz.	100
Tenuifolia. Double flowers.....	.25	2.50	
Single flowers.....	.12	1.00	

JAPANESE TREE PÆONIES:

Extra strong plants, 10 distinct double varieties. 75c each; \$7.50 per doz.

PAPAVER ORIENTALE. (Giant Oriental Poppies.)

For gorgeous coloring these Giant Oriental Poppies have few rivals amongst hardy plants. To cut for vases the flowers which are abundantly produced, are greatly valued, and will last as long as other flowers, if cut in the early morning, when the bud is bursting, and the outer green calyx be stripped off; they will then open in water and the petals will not readily drop. The varieties enumerated are all first class.

Pot grown Poppies can be planted successfully without the least set-back.

PHLOX. Perennial.

The beauty and usefulness of these grand border plants give to them a deservedly first place amongst hardy plants for cutting, their large trusses go a long way in flower decorations. In color they range from pure white to the richest crimson and purple and from soft rose and salmon to bright coral red, all having a delicate fragrance. They succeed in almost any soil enriched with manure. If the first spikes of bloom of the Suffruticosa or Early Flowering Phlox are removed as soon as over, and the plants given a good soaking of water they will produce a second supply of flowers, thus continuing the display until late in autumn. These later blooms are often much finer than the first.

A great advance has been made in the last few years in this beautiful and useful family of hardy plants, the result being large and bolder trusses, with individual flowers, twice and thrice the size of those of the older kinds. New and striking colors of great beauty have also been added. The varieties offered below include the finest of new introductions and only the very best of the older kinds.

For those who are not acquainted with the many varieties herein offered and whom the brief descriptions may not assist in selection, we have marked with an asterisk such varieties we consider the best for all purposes.

Notice—Our prices are for 1 year field grown plants or we can furnish plants in 2 1/2 inch pots that will flower the first season, at half the prices quoted for named sorts.

	Each	Doz.	100

PHLOX DECUSSATA IN MIXTURE:

In going over our Phlox during the growing season we find many sorts sporting, which are always carefully removed and thrown together in mixture. Besides these, names are sometimes lost by accident. This mixture contains some of the best types of all colors,

making them suitable for massing where no particular color effect is desired. Strong field roots in mixture. **\$25.00 per 1,000; 5 cents each; 50 cents per doz.; \$3.00 per 100.**

PHLOX SUFFRUTICOSA

or early flowering varieties:

PRIMULAS. (Hardy Primroses.)

A Primula garden is a charming sight, and once seen is not soon forgotten. Naturalized in shady spots on rockeries and on walls, etc., These Alpine gems present a lovely picture in spring and early summer. All hardy. Most varieties stand gentle forcing and are much in demand at Easter.

PRIMULA.—Continued.**HARDY ALPINE SPECIES:**

	Each	Doz.	100
Auricula. the sweet-scented yellow Swiss species with large, handsome silver-edged, mealy foliage. A lovely plant. Height, ½ ft. .15	1.25	7.50	
Acaulis Frimbriata. Large flowers; mixed. .10	.85	6.50	
Pompadour. (See Novelties.) .50			
Elatior. (Polyanthus.) .10	.85	6.50	
Veris Superba. Giant yellow Polyanthus. Hardy Primrose. .12	1.00	7.50	
Vulgaris. English yellow Primrose. .12	1.00	7.50	
Primula Courtesoides Sieboldii: Hardy Japanese Primrose. See Novelties.			
The flowers of this variety equal the Chinese Primrose (<i>Primula Sinensis</i>) in color and size and can be forced into bloom very quickly in a low temperature of fifty degrees. It is a grand plant for all purposes, and is certain to become a universal favorite when better known. Perfectly hardy.			
They embrace all shades, from brightest red to pale rose and white. Colors separate or in mixed.			
Price, 15 cents each; \$1.50 dozen, and \$9.00 per 100.			
Collection of one each of twelve varieties for \$2.00.			
Prunella Webbiana. .10	.85	6.50	
Pulmonaria Saccharata			
Maculata. .12	1.00	7.50	

PYRETHRUM ROSEUM

The Pyrethrum in May and June occupies the same position as that held by the Chrysanthemum in September and October, therefore the name "Spring Flowering Chrysanthemum" is not inappropriately given to it. The flowers are large, elegantly formed, and vary in color from snow white to the richest crimson. The habit of the plant is graceful, the foliage elegant, and the flowers are produced in great profusion. It is very hardy, surviving without the slightest protection during the severest winters. In herbaceous borders, shrubberies and situations where a mass of color is important in May and June Pyrethrums are matchless. As cut flowers for vases and table decoration, the blossoms are of the greatest value, and last in water longer than almost any other flowers.

The single varieties are thought more charming than the double; their simplicity, brilliancy of color and as a rule freer blooming, rendering them better adapted for cutting of decoration.

	Each	Doz.	100
Pyrethrum Roseum. Fl. Pl. Double varieties. Our collection of these desirable hardy plants came from a celebrated English specialist, and embrace the best varieties suitable for cut flowers, etc. We have a fine lot in 3 inch pots in the following varieties and offer them as follows. .25	2.00	15.00	
Anacreon. Bright rose; white tips.			
Deese. Flesh color.			
Kriemhilda. Pale rose.			
Marceau. Rosy carmine tipped yellow.			
Mont Blanc. White.			
Sir James Miller. Similar to Anacreon; larger flower.			
Triumph de France. Bright crimson, shaded purple.			
Lady Kildare. Delicate buff yellow tinged with flesh; exceedingly pretty.			

PYRETHRUMS ROSEUM HYBRIDUM SINGLE

The brilliant and fresh colors of the Single Pyrethrum render it a desirable plant for cut flower for market.

SEDUM. (Stonecrop.)

Charming plants with great diversity of character, most of them having dwarf and spreading growth, while a few are stately border plants. For carpeting, also for covering rockwork, walls and ruins. Few plants are so useful, as they will grow in any place when fully exposed to the sun. Some have purple, brown, or mealy white foliage, others have a profusion of yellow, white or pink flowers; the dwarf varieties are extensively used for edgings and carpet-beds.

TROLLIUS. (Globe Flower.)

Beautiful showy border plants having an elegant and luxuriant foliage, and, in early summer large, handsome, globe shape flowers, which are valued for cutting. The Trollius takes the first place among hardy border plants, thriving equally well in half shady or sunny situations; it is also a striking and beautiful subject for planting by the water-side. Plant in Autumn or Spring.

VIOLA CORNUTA. (Tufted Pansies.)			
Most valuable of Spring and Summer bed-			
ding plants.			
These bedding Violas are among the			
most valuable spring and summer plants,			

and are unrivalled where a continual mass of bloom of bright and attractive colors are required from spring till autumn. If cut back in July after the first crop of bloom is over, a little fresh soil being placed around the roots, and a good soaking of water given, the plants at once produce a profusion of young shoots which will give a continual display of bloom till late in autumn.

PALISADES NURSERIES, SPARKILL, N. Y.

MY DEAR SIRs:—In these times when a man wishes to economize all along the line, your catalogue is indeed most satisfying. I have received probably every catalogue issued this spring by the large firms in the east and middle west and the prices presented by your house run from 33% to 300% less on almost every item. As I have purchased plants of you and your predecessor I know that the stocks are equal in every instance to those sent out by the others, so it seems that the payment of high prices for the usual flower garden this spring is a matter of choice and not of necessity.

(Signed) PARKE H. DAVIS.

EASTON, PA., APRIL, 28, 1908.

RIVERTON, N. J., May 17, 1907.

THE PALISADES NURSERIES, SPARKILL, NEW YORK.

GENTLEMEN:—The Chrysanthemums reached me safely yesterday and were in perfect condition as were all the plants you sent the first of May, owing no doubt to your careful packing. I have not lost a single plant of the 265 which were sent first.

Very truly yours, KAY MECHLING.

The Heavenly Blue Flower

The best
Border
Plant

HARDY

ANCHUSA

(DROPMORE VARIETY)

TRUE BLUE

ANCHUSA ITALICA

DROPMORE VARIETY-TRUE

THE most important Blue Flowered Hardy Border Plant we have. It is a strong vigorous growing plant of branching habit and perfectly hardy. It grows to a height of 3 feet the first season planted, making a stout bush that is literally covered with the PUREST BLUE flowers. one inch in diameter, during June and July.

It dies down to the ground in winter when its tops should be cut off, and a forkful of manure put over it for winter protection. It is very conspicuous when in flower and will become a great favorite when fully known. It seeds very sparingly and does not come TRUE from seed.

We are pleased to offer plants of this splendid hardy border novelty. It is really the most meritorious of all plants of recent introduction,

A life long florist of Auburn, N. Y. says: "I have been delighted with the beautiful Anchusa (Dropmore variety). It can hardly be equaled for spectacular effect. It will be a permanent "Glory of the Garden".

A popular florist of Colorado Springs, writes: "The Anchusæ did finely and are in full bloom now."

A well-known florist of our city, says: "The Anchusa proved to be one of the most attractive plants in my garden. It is a novelty of merit, and ought to be in every collection of hardy plants".

Mr. John Dunbar, Assistant Superintendant of the Rochester Parks, says: "The Anchusa is of the best recently introduced hardy perennial plants. The intense deep blue flowers are remarkably showy."

An expert amateur, of Rochester, N. Y., says: "It is by far the most satisfactory plant I have had in the garden this summer. It was in bloom for a very long period, grew tall and bushy and was a mass of "heavenly blue".

See page 3 of our Catalogue for price of plants.

THE BLUE BIRD FLOWER

VERONICA
LONGIFOLIA
SUBSESSILIS.

ONE OF
THE
BEST
HARDY
FLOWERS.

IN
BLOOM
THE
ENTIRE
SUMMER.

ROCHESTER LITHO CO.

**The most beautiful Blue Flowered
Plant in the World.**

The Blue Bird Flower.

ITS MERITS:

1. Perfect hardiness and easy culture.
2. Adaptability to all soils and climates.
2. Enormous blooming habit.
4. Tendency to increase in strength and beauty each year.
5. Its beautiful blue flowers, valuable for cutting etc.
6. Best hardy Blue Flowering Border Plant.

The Blue Bird Flower (*veronica longifolia subsessilis*) is destined to create as much fuvor in the floral world as did the Golden Glow. Aside from Larkspur, some varieties of Altheas and Perennials, there are few true BLUE FLOWERED PLANTS. The Blue Bird Flower is the handsomest blue flowered plant we know of, growing to a height of two feet and COMPLETELY STUDED with its spikes of blue flowers, that at a distance resemble blue birds perched in the foliage, Its flowers are fine for cutting. It is perfectly hardy and increases in strength and beauty each succeeding year. It makes the ideal and very best blue flowered hardy border plant obtainable.

See page 8 of our Catalogue for price of plants.

GROWERS OF TREES, SHRUBS AND PLANTS

TELEPHONE 200 PIERMONT

SPARKILL, N. Y.,

To the Recipient:-

The nature of our business demands our making, several years ahead, arrangements for a normal supply, for our annual requirements.

The recent general stagnation in trade has caused us to find ourselves at the beginning of this season with an over abundant supply of plants for the Hardy Garden.

After deliberating the best manner of reducing our surplus stocks quickly, we concluded that if many of our customers and their friends were extended the opportunity of purchasing their personal garden needs at wholesale or dealers rates, it would reduce our surplus stock quickly and prove a mutual benefit.

With this object in view we selected, among some others, your name and address from our mailing list and are sending you a copy of our regular wholesale price list (intended for dealers only), hoping that you will take advantage of this rare opportunity of buying at the lowest possible cost, your garden supplies, which spells economy, said to be in order at the present time, and we will undertake to guarantee you entire satisfaction.

Hoping to receive your valued orders in an early mail, which will enable us to reserve the plants for shipment at any time suitable to your requirements.

Yours very truly,

PALISADES NURSERIES.

. 11

P.S. We would especially call your attention to Mr. Luther Burbanks' newest and latest production, 'THE WONDERBERRY' offered on page 4 of our catalogue.

DAHLIAS.

Our Dahlias have all been carefully grown on our Nurseries, and we believe our collection contains all the most desirable and standard sorts both for private and commercial use.

OUR PRICE OF DAHLIA ROOTS AND PLANTS

We furnish dormant roots until our supply is sold, after which orders are filled with plants from pots, which always give entire satisfaction at the uniform price of **10c** each. **75c** per dozen. **\$5.50** per 100 (except where otherwise noted.)

CACTUS VARIETIES:

Loose, fluffy Chrysanthemum-like flowers.

Alfred Vasey. Reddish crimson shaded amber.

Arachne. Spider-like form, creamy white edged crimson; irregular.

Austin Cannelle. Light crimson rose.

Bravo. Robust grower, much on the order of Catherine Duer; flowers rich Jacqueminot red, on long stiff stems well above the foliage; one of the best for cutting; late flowering.

Brunhilde. Rich plum color.

Burbank. Deep red purplish sheen.

Cannelle's Crest. Fine red variety

Capt. Broad. Glowing scarlet crimson.

Columbia. Bright vermillion scarlet, tipped with white, very telling variety in competition.

Cornucopia. Carmine scarlet, long narrow petals.

Cycle. Bright rosy crimson, early and profuse.

Capstan. Bright red with apricot shading; early and free flowering.

Countess of Lonsdale. Salmon red; one of the most profuse bloomers.

Delicata. Delicate pink with light salmon shading.

Erlokoenig. Light saffron orange; shining, profuse bloomer.

Fuerst Bismarck. Large, rosy crimson; bluish sheen.

Florodora. Wine crimson; one of the best Cactus Dahlias.

H. F. Michel. Soft yellow, turning to deep orange red.

Innovation. Red and white striped; sometimes clear red or white.

J. W. Wilkinson. Brilliant rose carmine, lighter than Brunhilde.

Kingfisher. Rosy purple; very early and profuse.

Kriemhilde. Brilliant pink, shading to creamy white towards the centre.

Lady Pearson. A distinct shade of rosy red; most desirable sort for all purposes.

Mrs. H. J. Jones. Immense flower, rich bright scarlet cream colored edge.

Mrs. J. P. Clark. Reddish cinnamon color; pinkish peach-colored points.

Matchless. Dark maroon, velvety brown sheen.

Mrs. Dickson. Beautiful rose color, with broad petals.

Perlhilde. (New. See Novelties.) Plants only. April 1st... **.15** ea. **1.50** doz.

Primrose Dame. The best yellow Cactus Dahlia, early and profuse.

Princess Louise Victoria. Broad petals of a deep pink color, early and continuous bloomer. (Paeonia Type.)

Progenitor. Bright carmine furcated petals like staghorn fern.

Sieglinde. Bright orange yellow.

Spotless Queen. Best white cactus variety. Free flowering.

Standard Bearer. Fiery scarlet; one of the best.

Stella. Vivid crimson, very desirable

CACTUS VARIETIES.—Continued.

Uncle Tom. Dark maroon, very fine.

Uhland. Deep glowing carmine; one of the richest.

Walthari. Color cream white, flowers on stiff stems, well above the foliage.

Wm. Haage. Deep purplish red, on the order of Florodora.

DECORATIVE VARIETIES

Broad, flat petal types.

For price of roots and plants see head of list.

Antietam. Large perfectly formed flowers of intense red.

Blue Oban. Reddish violet and purple

Clifford W. Bruton. Best canary yellow; long stemmed, vigorous grower.

Countess of Pembroke. Soft rosy lake, profuse bloomer.

Catherine Duer. A Newport favorite, crimson red color; fine for cutting exhibition purposes; tall grower.

Crimson giant. Very large crimson flower.

Henry Patrick. Large pure white.

Jack Rose. (New. See Novelties.) Plants only. April 1st. **.50** ea. **5.00** doz.

Kaiserin Augusta Victoria. Pure white, flowers as profusely as storm King, and is a continuous bloomer.

Lindhurst. Lively scarlet, one of the best.

Maid-of-Kent. Cherry red, tipped white.

Lucielle. Old gold fine form, free bloomer.

Marchioness of Bute. Pure white, heavily tipped deep pink.

Madame Van Den Dael. Color, soft shell pink, with deeper margin, immense flower.

Mrs. Basham. Fine reddish salmon, large and exceedingly handsome.

Mrs. Roosevelt. Silvery rose, mammoth flower.

Nymphaea. Clear shell pink, resembles a water lily.

Nedding. Violet rose, shade of maroon; one of the best.

Oban. Very large rosy lavender, overlaid silvery fawn.

Perle de la Tete d'Or. One of the finest white Decorative Dahlias.

Sylvia. Giant Nymphaea. Soft pink shading to white.

Wm. Agnew. Vivid flowing scarlet.

SHOW VARIETIES.

Formal Flowers, Quilled Petals:

For price of roots and plants see head of list.

A. D. Livoni. Pure pink, very early and profuse bloomer.

Arabella. Pale primrose, shaded old rose and lavender.

Bird of Passage. White suffused blush petals tipped carmine pink.

Bonton. Rich velvety garnet, good stem and flower; early and late.

Cameliaeflora. Snow white, considered equal to Storm King, but flowers much larger; quite distinct.

Chas. Lanier. (New. See Novelties.) Plants only. April 1st. **.20** ea. **2.00** doz.

Crimson Ball. Dark crimson.

Fanny Purchase. Yellow, fine form.

Floral Park Jewel. Flowers of both decorative and show types are borne on the same plant, in colors varying from a solid white to a solid red; profuse bloomer.

Frank Smith. Purplish maroon, almost black, tipped with white.

Glowing Coal. Brilliant red.

Grand Duc Alexis. Pure white, lilac tipped; very large flowers.

Jamaica. Extra large flowers of deep rich purple.

La France. Soft rosy lavender.

SHOW VARIETIES.—Continued.

Lucy Fawcett. Rosy fawn, striped and spotted dark red.

Magnificent. Deep yellow; large flowers, dwarf habit.

Miss Florence Shearer. Clear soft lilac, edged lighter.

Menheddy Beauty. Buff streaked and blotched crimson; in no respect has it an equal among the fancy show types. Long stems, large flower, fine for cutting.

Oyster Bay. Snow white, without a peer.

President. White edged with lavender pink.

Penelope. White flaked lavender; one of the most beautiful varieties; long stems and perfect formation.

Prince Bismarck. Very large, deep rich purple.

Queen Victoria. Pure yellow; good stem.

Red Hussar. Pure cardinal red flower, fine form, splendid for cutting.

Souvenir. White with brilliant scarlet margin.

White Swan. Pure white; good stem, best for cutting.

POMPON VARIETIES:

Small round double flowers. For price of roots and plants see head of list.

Alita. Pink and white spotted.

Little Bessie. Cream white, free flowering. Quilled petals.

Prince Charming. White suffused and tipped purple pink; early and continuous bloomer.

Storm King or blizzard. Dwarf snow white; early and profuse.

Sunbeam. Bright crimson; fine form.

Vivid. Intense vivid scarlet.

PAEONY. Flowered Dahlias:

Princess Louise Victoria. This is sometimes classed as a cactus, but it is really one of the Paeony-flowered type. Color a beautiful deep rose-pink, clear and effective. Very broad petals and splendidly formed flowers.

Queen Wilhelmina. A pure white variety and in this the golden yellow center shows to unusual and distinct advantage. A splendid contrast to the other sort. Plants only..... **.25** ea. **2.50** doz.

SINGLE VARIETIES:

Large Cosmos-like flowers.

For price of roots and plants see head of list.

John Downey. Intense glowing crimson scarlet.

Lady Whitehead. Bright cerise pink.

Snow Queen. Pure white.

Twentieth Century. Rosy crimson with white tips.

New Century Dahlias. Crimson, white, lavender.

COLLARETTE DAHLIAS:

Single with white frill or collar around centre.

For price of roots and plants see head of list.

Galia. Bright rose, suffused and striped scarlet.

President Viger. Rich blood-red, white collarette.

Standard of Lyons. Bright crimson petals pointed and less reflex than other sorts.

DAHLIAS IN MIXTURE:

Types and colors separate without names, or all colors mixed. Roots only. **\$20.00** 1,000. **.05** ea. **.50** doz. **2.50** 100

PERENNIAL FLOWER SEEDS.

HOME SAVED AND TESTED.

For our own sowing we collect the seed of many varieties of Perennials on our Nurseries. This seed we find on account of its freshness and the care with which it is saved and dried, more reliable than that grown abroad and procured through dealers. We give below a list of such sort as can be supplied in limited quantities or by the packet only, which packets will be found to contain a liberal quantity and we will furnish them at the uniform price of 10c each, three for 25c; per doz. 85c, per 100 \$6.50.

We are also in position to grow seeds of the different varieties of Perennial and other flower seeds under contract and solicit correspondence.

<p>Ancanthus mollis latifolius. Achillea, Ptarmica Fl. Pl., "The Pearl." Aconitum Napellus. (Monkshood.) Adonis vernalis. Adenophora Potanini. Agrostemma Coronaria. 	Pansies.	Zea.	
		Zinnia.	

THE WONDERBERRY. (Burbank's.)

Bears Fruit in Three Months Time.

The introducer's description of this new plant is as follows:

Fruit blue-black, like an enormous rich blueberry in looks and taste. Unsurpassed for eating raw, cooked, canned or preserved in any form. The greatest garden fruit ever introduced and equally valuable in hot, dry, cold or wet climates. Easiest plant in the world to grow, succeeding anywhere, yielding great masses of rich fruit all summer and fall, and all winter in pots. As a pot plant it is both ornamental and useful. The greatest boon to the family garden ever known. Everyone can and will grow it. We have a limited number of plants in 3 inch pots that should begin to bear fruit in a short time.

15c each, \$1.50 per dozen, \$10.00 per 100.
